C/ Pablo Iglesias, 76 - Pol. Ind. Pedrosa
E-08908 L'Hospitalet de Llobregat Barcelona
- SPAIN

Specialized in the manufacture of wirewound power resistors, our products range is from 50W to 200KW including low inductance, high breakdown voltage, high operating voltage, suitability to high energy impulses and designs for cooling in free air or forced air.

Our resistors can be made from IP00 till IP54 protection and in special versions, such as noninductive, special insulation, special terminals or cables and thermal switch.

OUR POWER RESISTORS ARE USED IN

- Drive technology
- Crane applications
- Energy conversion
- Industrial automation
- Machine & Welding tools
- Services for the industry
- Testing and laboratory technology
- Motor control resistors
- Dynamic braking resistors
- Resistors for wind & solar energy
- Soft crowbar resistors
- Resistors for load banks
- Resistors for RAIL Traction
- Filtering resistors
- Heating

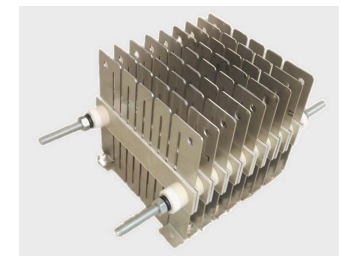

CUSTOMIZED RESISTORS
From 15 up to 40 KW

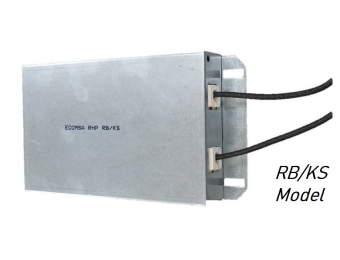

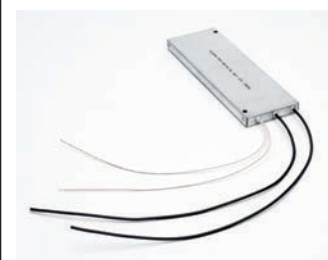

**IP-20 AND IP-23
BRAKING RESISTORS**
From 0,5 up to 40 KW

CEMENTED / NOISELESS
Wirewound tubular
fixed resistors

STEEL GRID Resistors
made of stainless steel

RB/KS Model

FLAT ENCLOSED
Wirewound resistors
From 100 up to 1300 W

Our Technology, high efficiency and robustness characterize our direct and alternating current LOAD BANKS.

IP-54 RESISTORS
From 1 up to 4 KW
